This Public Information Brochure (PIB 22) is intended as a convenient reference to the bands used in the Fixed Service, showing details of channel frequencies and separations between the 'go' and 'return' channels. In some bands, interleaved plans are used. Notes identify where interleaved plans exist.

Some general principles governing the arrangement of Fixed Service bands are as follows:

- At any particular site, all the 'go' channels should be in one half of the band, and all the 'return' channels should be in the other half of the band.
- Care needs to be taken to consider adjacent bands when referring to channels and bands in this document.
- It is often desirable that alternate polarisation should be used for adjacent channels operating in the same half of the band.
- There are considerable advantages in using a uniform frequency channelling arrangement which can accommodate a range of system capacities.
- The inclusion of a band plan, or a particular channel in any band plan, does not necessarily mean that the band or channel is available for licensing.

This document should be read in conjunction with the Radio Licence Policy Rules (PIB 58) and the Radio Licence Certification Rules (PIB 38).

Disclaimer

The Ministry of Business, Innovation and Employment (the Ministry) makes no warranty, express or implied, nor assumes any liability for any loss suffered, whether arising directly, or indirectly, due to the sole reliance on the accuracy or contents of this Public Information Brochure (PIB 22).

Changes

Radio Spectrum Management (RSM) may change, delete or add to or otherwise amend information contained in the document from time to time to reflect evolving policies. Changes to this document will be notified through the 'Radio Spectrum Management Business Update' newsletter that is emailed to those who subscribe. The changes are also notified in the news section on the RSM website, www.rsm.govt.nz.

Clarification and Corrections

RSM will provide clarification of the information contained in this document when requested and would appreciate receiving suggestions for its improvement or advice relating to inaccuracies or ambiguities. Such matters may be emailed to radio.spectrum@mbie.govt.nz.

Correspondence received will be acknowledged, investigated and appropriate action taken.
